This is a Python Workshop for 5 Days, organized for all students to learn from scratch open to all the students from all streams.

It contains 5 modules:

- 1) The concepts will be explained through PowerPoint Presentations followed by example programs.
- 2) Specific time will be allotted to execute programs.
- 3) After each concept, duration will be provided for clarifications and doubts.
- 4) The details of IDLE used and requirements for program execution will be provided prior to commencement of class.
- 5) Assignments will be provided for proper understanding of concepts that are not compulsory but recommended.
- 6) All the concepts covered will be an overview and fundamentals.

Participants need to register for the event using the link: <https://bit.ly/3AXcoaH>

Note: Registration without payment will not be considered. Payment can be done using the above link.
